

Organizations see value in their data but are struggling to access it:

80%
of enterprise data is trapped below the surface

Unstructured formats (e.g. checks, invoices or bank statements) have an inconsistent layout, which makes it increasingly difficult to extract and action data.

Structured formats (e.g. tax or claim forms) follow a standard layout.

This figure is increasing by **35%** year-over-year.

Most automation tools lack the intelligence and flexibility required to automate increasingly complex, document-heavy processes. This results in:

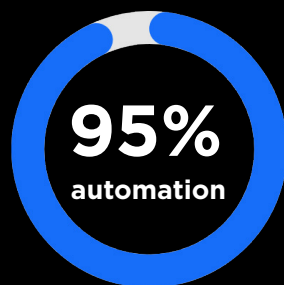

\$5T
in productivity losses

87%
of automation initiatives fail to scale

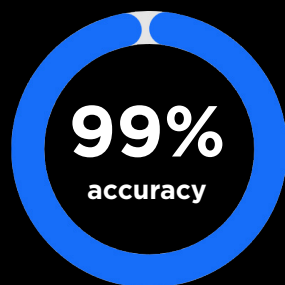

\$3T
lost annually due to poor data

Bring all your documents to Hyperscience

The most flexible, intelligent automation platform for both document processing and post extraction management, enabling organizations to improve customer satisfaction, increase revenue growth and reduce costs.

+

With additional ML-driven performance improvements over time.

3-5X ROI from ease of use and flexibility to integrate

10X faster processing to deliver the best customer experience

Find the best automation solution for your business.
